

# Level 1 Dismantle, assemble, install and maintain a Desktop computing system

e-Equals  
Unit syllabus  
7262-102

## **About City & Guilds**

City & Guilds is the UK's leading provider of vocational qualifications, offering over 500 awards across a wide range of industries, and progressing from entry level to the highest levels of professional achievement. With over 8500 centres in 100 countries, City & Guilds is recognised by employers worldwide for providing qualifications that offer proof of the skills they need to get the job done.

## **City & Guilds Group**

The City & Guilds Group includes ILM (the Institute of Leadership & Management) providing management qualifications, learning materials and membership services and NPTC (National Proficiency Tests Council) which offers land-based qualifications. City & Guilds also manages the Engineering Council Examinations on behalf of the Engineering Council.

## **Equal Opportunities**

City & Guilds fully supports the principle of equal opportunities and we are committed to satisfying this principle in all our activities and published material. A copy of our equal opportunities policy statement 'Access to assessment' is available on our website or from the Customer Relations team.

## **Copyright**

The content of this document is, unless otherwise indicated, © The City and Guilds of London Institute 2005 and may not be copied, reproduced or distributed without prior written consent.

However, approved City & Guilds centres and learners studying for City & Guilds qualifications may photocopy this document free of charge and/or include a locked PDF version of it on centre intranets on the following conditions

- members of a centre's staff may copy the material only for the purpose of teaching learners at that centre who are studying towards a City & Guilds qualification, or for internal administration purposes
- learners may copy the material only for the purpose of their own private study towards a City & Guilds qualification
- the 'standard copying conditions' shown on City & Guilds website.

Please note: National Occupational Standards are not © The City & Guilds of London Institute. Please check the conditions upon which they may be copied with the relevant Sector Skills Council.

## **Publications**

City & Guilds publications are available online or from our Publications Sales department at the address below or by telephoning +44 (0)20 7294 2850 or faxing +44 (0)20 7294 3387.

## Unit 102 Dismantle, assemble, install and maintain a Desktop computing system Level 1 (Core)

### Rationale

This unit will enable candidates to identify parts and peripherals of a Personal Computer (PC), dismantle and assemble a PC, install software, and maintain a PC and its peripherals.

There are **four** outcomes to this unit. The candidate will be able to:

1. Identify parts and peripherals of a PC
2. Dismantle and assemble a PC
3. Install an operating system, drivers and applications on a PC
4. Maintain a PC, peripherals and software.

To achieve these outcomes, candidates will follow set procedures and escalate any difficulties they might come across during their work.

### Guided learning hours

The recommended guided learning hours for this unit are 45 hours.

### Connections with other awards

### NVQ links

Outcomes	This award contributes to the knowledge and understanding of the following elements of NVQ(s)
3	Software installation and upgrade
1,2,3,4	Working with ICT hardware and equipment
2,3,4	Technical fault diagnosis
2,3,4	Technical fault remedy selection
1,3,4	Technical advice and guidance
3,4	Security of ICT systems
2,3,4	System operation
2,3,4	Testing ICT systems

### Key Skills links

Communication	C1.1 C1.2 C1.3
Application of number	
IT	1CT1.1 ICT1.2 ICT1.3
Working with others	WO1.1 WO1.2 WO1.3
Problem solving	PS1.1 PS1.2 PS1.3
Improving own learning & performance	LP1.2 LP1.3

### Assessment

Assessment of this module will be by completion of a set assignment covering both practical activities and underpinning knowledge.

## Outcome 1: Identify parts and peripherals of a PC

	Candidate's signature	Date
<p><b>Practical activities</b>  <b>The candidate will be able to:</b></p> <ol style="list-style-type: none"> <li>1. Prepare an inventory of equipment/peripherals either available or connected to the PC, eg           <ul style="list-style-type: none"> <li>• Base unit</li> <li>• Monitor</li> <li>• Printer</li> <li>• Scanner</li> <li>• Keyboard</li> <li>• Mouse</li> <li>• Speakers</li> <li>• Joystick, etc</li> </ul> </li>   <li>2. Prepare a log of visible ports on the available hardware and map them to cables/plugs/devices they would connect to</li>   <li>3. Prepare an inventory of all <b>visible internal parts</b> of the PC, eg           <ul style="list-style-type: none"> <li>• Power supply unit (PSU)</li> <li>• Hard disk</li> <li>• Floppy disk drive</li> <li>• CD/DVD drive</li> <li>• Motherboard</li> <li>• CPU</li> <li>• Memory</li> <li>• Graphics card</li> <li>• Sound card</li> <li>• Modem/NIC, etc</li> </ul> </li> </ol>		

**Underpinning knowledge****The candidate will be able to:**

1. State what a personal computer is
2. State the difference between hardware and software
3. List the differences between an operating system and application software
4. State the importance of creating system logs and taking an inventory
5. Identify the use of various peripherals in a PC system, eg
  - Monitor
  - Speakers
  - Keyboard
  - Mouse
  - Scanner
  - Printer
  - Webcam
  - Joystick, etc
6. Identify the use of different internal parts of a PC, eg
  - Motherboard, CPU, Memory
  - Power supply unit
  - CPU heat-sink/fan
  - Expansion cards eg Graphics/Sound/Modem/NIC, etc
  - Floppy disk drive, Hard drive
  - CD/DVD drive
  - Internal cables, etc
7. State what Electro Static Discharge (ESD) is
8. List different methods of protection from ESD

## Outcome 2: Dismantle and assemble a PC

	Candidate's signature	Date
<p><b>Practical activities</b> <b>The candidate will be able to:</b></p> <ol style="list-style-type: none"><li>1. Prepare a log of available hardware and draw basic diagrams of how ports, cables and plugs are connected together</li><li>2. Maintain necessary health &amp; safety precautions, dismantle peripherals and components from the base unit</li><li>3. Assemble a PC from a range of available parts</li><li>4. Safely pack and store ICT equipment</li><li>5. Perform safety checks on an assembled system, eg<ul style="list-style-type: none"><li>• Loose connectors</li><li>• Loose screws</li><li>• Functionality of cooling fans</li><li>• Seating of expansion cards, etc</li></ul></li><li>6. Test PC for functionality and where possible rectify any problems</li></ol>		

## **Underpinning knowledge**

**The candidate will be able to:**

1. State common safety factors for dismantling and assembling a PC, eg
  - Electrical hazards
  - ESD precautions
  - Sharp edges
  - Manual handling, etc
2. Identify the use of the following parts of a PC whilst assembling the system:
  - Serial/Parallel/USB/Firewire (IEEE 1394) port
  - Audio connections
  - Modem/NIC
  - PS/2 type ports
  - Power connectors
  - Video Port
  - LEDs and other indicators
  - Various switches
3. Identify tools that can be used in dismantling a PC, eg
  - Antistatic wrist-strap
  - Screw drivers
  - Tweezers
  - Torch, etc
4. State common problems that can occur during installing of a PC, eg
  - Damaged parts
  - Wrong parts
  - Software problems
  - Unseated expansion cards
  - Loose connectors and jumpers, etc
5. List methods of manual handling and safe storage of components of a PC, eg
  - Hard disk
  - Expansion cards
  - RAM, etc

## Outcome 3: Install an operating system, drivers and applications on a PC

	Candidate's signature	Date
<p><b>Practical activities</b>  <b>The candidate will be able to:</b></p> <ol style="list-style-type: none"> <li>1. Check compatibility of hardware and minimum system requirements for installation of an operating system (OS), eg               <ul style="list-style-type: none"> <li>• CPU speed</li> <li>• Hard disk size</li> <li>• Memory capacity, etc</li> </ul> </li> <li>2. Install an operating system eg Windows 98/XP</li> <li>3. Install/update drivers for various devices, eg               <ul style="list-style-type: none"> <li>• Video</li> <li>• Audio</li> <li>• Modem/NIC</li> <li>• Printer, etc</li> </ul> </li> <li>4. Prepare/configure a system to suit different user requirements eg display, colours, mouse pointers, icons, etc</li> <li>5. Install various types of applications on a PC, eg               <ul style="list-style-type: none"> <li>• Anti-virus</li> <li>• Firewall</li> <li>• Anti-spyware</li> <li>• Word processor/spreadsheet eg Office</li> <li>• Multimedia applications</li> <li>• Photo editor, etc</li> </ul> </li> </ol>		

**Underpinning knowledge****The candidate will be able to:**

1. State the need for an operating system
2. State the purpose of testing hardware and fixing failures before installing an operating system (OS)
3. Identify the use of various operating systems available, eg
  - Windows 98
  - Windows XP
  - Linux
  - MAC OS
4. State the need to check minimum system requirements for installing an OS
5. State the function of the BIOS when installing an OS
6. List various steps of installation of an OS
7. State what device drivers are
8. Identify safe sources and procedures of obtaining device drivers
9. State the need and use of various applications eg
  - Office software
  - Internet browsers
  - Anti-virus software
  - Firewall
  - Anti-Spyware software
  - Pop up blockers
  - Multimedia players
  - Photo editors, etc

## Outcome 4: Maintain a PC, peripherals and software

	Candidate's signature	Date
<p><b>Practical activities</b>  <b>The candidate will be able to:</b></p> <ol style="list-style-type: none"> <li>1. Carry out maintenance (cleaning) on different types of hardware. Report/resolve problems encountered and create maintenance records for each item, eg               <ul style="list-style-type: none"> <li>• Base unit</li> <li>• PSU/CPU fan</li> <li>• Monitor</li> <li>• Keyboard</li> <li>• Mouse</li> <li>• Printer</li> <li>• Scanner, etc</li> </ul> </li> <li>2. Carry out a range of software maintenance procedures. Report/resolve problems encountered and create maintenance records for each item, eg               <ul style="list-style-type: none"> <li>• Clear unused files</li> <li>• Disk Defragmenter</li> <li>• Disk Scanner</li> <li>• Anti-virus check/update</li> <li>• Software patches/bug fixes</li> <li>• Driver updates</li> <li>• Disk/data back-up, etc</li> </ul> </li> </ol>		

<p><b>Underpinning knowledge</b>  <b>The candidate will be able to:</b></p> <ol style="list-style-type: none"> <li>1. State the importance of preventive maintenance for a PC and peripherals</li> <li>2. List the Do's and Don'ts of computer maintenance</li> <li>3. Identify basic remedial actions to fix hardware &amp; software problems</li> <li>4. State preventive maintenance procedures for different types of hardware</li> <li>5. List a range of preventive maintenance procedures for software</li> <li>6. Identify resources required to carry out computer maintenance, eg               <ul style="list-style-type: none"> <li>• Cleaning foam</li> <li>• Cotton buds</li> <li>• Compressed air</li> <li>• Screen clean</li> <li>• Anti-virus software</li> <li>• Drivers updates</li> <li>• Software updates and bug fixes</li> <li>• Third party utility programs</li> <li>• Different tools, etc</li> </ul> </li> <li>7. State the need for keeping maintenance records</li> </ol>
